Summary

Computer Engineering graduate skilled in Java, Spring Boot, SQL, React.js, REST APIs, and Database operations. Experienced in building end-to-end applications through internships at Cravita and Austere Systems. Strong understanding of OOP, DBMS, and SDLC, problem-solving, and collaborative development using Git/GitHub. Seeking an entry-level Software Engineer / Full-Stack Developer role to build scalable applications and grow as an engineer.

Education

SSBT College of Engineering and Technology, Jalgaon

December 2021 – July 2025

Bachelor of Engineering in Computer

CGPA: 8.31

Experience / Internships

Cravita Technologies India Pvt Ltd — [Link](#)

June 2025 – Ongoing

Junior Engineer Intern

Pune, Maharashtra

- Developed modular and responsive UI components using React.js, focusing on performance and scalability.
- Implemented backend logic in **Java**, **OOPs**, and optimized MySQL queries.
- Debugged issues, wrote clean code, collaborated through **Git/GitHub**, and followed Agile workflows.

Austere Systems Pvt Ltd (2 Months)

June 2024 – August 2024

Software Developer Intern

Pune, Maharashtra

- Developed a scalable **CRUD**-based web module using MySQL improving data accessibility and reducing manual updates.
- Integrated third-party **APIs** into system modules, automating data flow and reducing manual effort by 30%.
- Worked in an agile environment, collaborating through **Git/GitHub** for version control and code reviews.

Projects

Car Rental Management System | [Link](#) | Java, OOPs, Collections (ArrayList/HashMap)

- Designed and developed a console-based Car Rental Management System using Core Java and OOPs principles.
- Built features like car availability tracking, rental booking, return processing, and fare calculation.
- Enabled features such as car addition/removal, rental calculation, and availability tracking.

Mass Layoffs Analysis using SQL | [Link](#) | SQL, MySQL

- Analyzed mass layoffs data using **SQL** to identify trends by Industry, Geography, and company size..
- Used **MySQL** DB to build automated data cleaning & preprocessing scripts, reducing manual work by 30%.
- Cleaned and transformed raw data into decision making using JOINS and subqueries.

Technical Skills

Languages : Java, C, SQL, Python(Basic proficiency), JavaScript

Web Technologies : HTML/CSS, React.js, Bootstrap

Backend : Spring Boot(Basics), REST APIs

Cloud & Databases: MySQL, MongoDB(Basics), GCP(Cloud Fundamentals)

Tools : Git/GitHub, Postman, Eclipse, VS Code, Power BI, ChatGPT, Gemini

Soft skills : Problem Solving, Quick Learner, Adaptability.

Core Subjects : DSA(JAVA), OOPs, DBMS, SDLC

Certifications

- **Career Essentials in Software Development | [Microsoft and LinkedIn](#)**

Extracurricular/ Achievements

- Completed Google Cloud Arcade Cohort 2025-Hands-on labs on **GCP services and cloud** fundamentals
- Consistently solving problems on HackerRank and GeeksforGeeks Practice, enhancing problem-solving and query optimization skills.
- Served as **Co-ordinator** in the Milestone 2024 Event, showcasing leadership, event management, and organizational skills.
